Subject: GM Diesel AECD review prior to GM submitting certificate request

I called Doug DeVries and asked for GM to meet with EPA and provide us with their AECDs for the 2 new 2017 MY diesels prior to GM submitting their application for certification. Doug asked that I send an e-mail with the request. He also indicated that at GM's cert preview CARB told GM to submit their diesel AECDs 3 months prior to the date that GM submits their certificate request. I do not believe GM has submitted anything to CARB yet.

I plan to send Doug an e-mail on Monday asking for GM to schedule two meetings with EPA to provide a detailed review of the AECDs along with their document describing the AECDs. We will have separate meetings to review the AECDs for the new 1.6L diesel Cruze and the 6.6L Duramax. As part of the AECD review I would like for our focus to be on AECDs related to component protection and when those AECDs are active. Let me know if there is anything else you think I should emphasize for our review with GM.

Thanks,

David
